 Linda Davian, Cary Medlin, Tracy Weaver, Darin Thomas)

## ***Attention Animal Guardian:***

**PLEASE contact the Veterinarian within 24 hours of your scheduled appointment if you need to reschedule!**

### **Night Before Surgery Instructions:**

- If the animal normally stays outdoors overnight, he/she must stay indoors the evening before surgery.
- **Animal MUST HAVE ALL FOOD WITHDRAWN BY 9:00PM the night before surgery.** This ensures that the animal's stomach is empty by the time he's put under general anesthesia. This lessens the chances that the animal will vomit and aspirate the vomit into his lungs. If your adult pet has eaten on the morning of surgery, the veterinary clinic will refuse surgery.

### **Post Surgery Instructions:**

- Please make sure you arrive on-time to pick up your animal friend.
- Please follow post-surgery care instructions provided to you by the Veterinary Clinic providing your pets spay or neuter.
- **Animals should be kept inside in a dry, clean, climate controlled, supervised environment for a minimum of 72 hours.**
- Additional services you may wish to consider on the day of the appointment to be paid directly to the veterinarian you choose: microchipping, heartworm testing & preventative, deworming, pain medicine and a cone to discourage licking incision site, etc. These services and their **ADDITIONAL COST** can all be discussed with the veterinary office when making the appointment or at time of drop off.

### **Did our service help you?**

We would love for you to send a photo of your animal friend with their story to:
